Open to Relocate | (346) 503-2322 | akashpsusa@gmail.com | [linkedin.com/in/akash-parasumanna-sridhar/](https://www.linkedin.com/in/akash-parasumanna-sridhar/)

PROFESSIONAL SUMMARY

Security Engineer with 3+ years of experience strengthening SOC operations, DLP/DSPM programs, detection engineering, incident response, vulnerability management, and security automation across enterprise and healthcare environments. Experienced in implementing and managing security controls for SIEM, EDR, SOAR, email security, endpoint protection, cloud telemetry, and data protection. Strong background reducing alert noise, improving detection coverage, protecting PHI/PII, supporting compliance requirements, and partnering with vendors, SOC teams, and IT stakeholders to deliver secure solutions.

CORE SKILLS

Programming/Scripting/Markup Languages – Python, Bash, PowerShell, YARA, HTML, JavaScript, YAML, KQL

Operating Systems – Windows 10, Kali Linux, Ubuntu, Android, iOS.

Active Directory/General Penetration Testing Tools – BurpSuite, OWASP ZAP, Nessus, Nmap, Rustscan, Metasploit, Hydra, Ffuf, Wfuzz, Gobuster, SQLMap, CyberChef, PowerSploit, CrackMapExec, Impacket Suite, Nikto, Cain & Abel, Bettercap.

Tools – Splunk, Elastic (Logstash, Kibana IPS/IDS), Arctic Wolf, Rapid7, CrowdStrike, Automox, Malwarebytes, Nessus, Mimecast, Darktrace, Azure Kubernetes Services (Pods, Containerization, Docker), Wazuh, Snort & OSSEC, Security Scoreboard, Upguard, Google Chronicle, Grafana Loki, Microsoft 365 Defender.

PROFESSIONAL EXPERIENCE

Campbell Clinic | Security Engineer | Remote, USA

Feb 2024 - Present

- Own day-to-day SOC operations, detection engineering, and incident response across CrowdStrike, Rapid7, Arctic Wolf MDR, Microsoft security telemetry, Mimecast, and Darktrace; reduced alert fatigue 40% and false positives 35% through tuning, enrichment, and threat-intelligence correlation.
- Build and optimize detection use cases, log ingestion, and alert correlation for endpoint, email, Azure cloud, and enterprise infrastructure telemetry, improving visibility across critical systems and accelerating analyst triage.
- Automate alert triage, enrichment, patching support, and response workflows using Fusion SOAR, Python scripting, and cloud integrations; reduced mean triage time 50% and improved containment speed.
- Manage enterprise email security and authentication controls across Mimecast, Darktrace, SPF/DKIM/DMARC, blocking 95%+ phishing attempts and improving visibility into anomalous email activity and potential data exfiltration risks.
- Drive Proofpoint/Purview DLP and DSPM initiatives across 3+ cloud environments, reducing sensitive data exposure risk for PHI/PII and supporting healthcare security governance.
- Evaluated end-to-end POC lifecycle for 10+ enterprise security tools, driving vendor evaluations, deployment decisions, and technology validation through direct collaboration at RSA and Black Hat conferences, directly influencing \$500K+ in security tooling decisions.

Schlumberger (SLB) | Cybersecurity Intern | Houston, TX

May 2023 - Aug 2023

- Developed Python pipelines to parse, normalize, and structure Azure Kubernetes Service (AKS) audit logs, improving visibility into container activity, user actions, and cloud security events.
- Operationalized Elastic Security, Kibana, and Logstash for high-volume telemetry ingestion; engineered KQL detection rules and automated alerting workflows that reduced false positives 25%.
- Reported a validated Kibana detection bug to the open-source repository and documented findings to support platform improvement and detection reliability. ([GitHub](#))

HTC Global Services | SOC Analyst

Jan 2022 - Aug 2022

- Triaged Splunk and Elastic SIEM alerts, correlated endpoint/network/application telemetry, validated true positives, and documented containment and remediation steps during incident response.
- Performed vulnerability assessments using Nessus and OpenVAS, identifying 100+ critical gaps per cycle, validating exploitability, and partnering with system owners to improve security posture 30%.

EDUCATION

University of Houston | Master of Science in Cyber Security | Houston, TX | Dec 2023

Relevant Coursework: Detection Engineering, Incident Response, Network Security/TCP-IP Analysis, SOC Operations

CERTIFICATIONS

Microsoft - SC-100, SC-200, CrowdStrike Falcon Administrator (CCFA), CompTIA SecurityX, CySA+, Security+, Cloud+, PenTest+, (**CompTIA Pathway Completed**), CHFI, CEH, eJPT, CCNA, GIAC - GFACT, AWS Certified Cloud Practitioner, Splunk Core Certified User, Rapid7 InsightIDR Specialist, Fortinet Certified Associate in Cybersecurity.

SPEAKING, RESEARCH & ACHIEVEMENTS

- **Black Hat USA 2026 Speaker** — “Detection Engineering Beyond the Inbox” ([LINK](#))
- **BlueTeamCon 2025 Speaker** — “Hardening Healthcare Email Against Advanced Threats” ([LINK](#))
- **HOU.SEC.CON 2025 Speaker** — “Prescription for Security: Hardening Healthcare Email Against Advanced Threats”
- **HOU.SEC.CON 2024 Speaker** — “AI Prompt Engineering in Cybersecurity”
- **AWS Re:Invent 2025** – All Builders Welcome Grant (Fully Sponsored By AWS) – Las Vegas, NV
- **U.S. DOE CyberForce Competition:** Represented the University of Houston in a national cybersecurity competition. Secured AWS EC2 instances by identifying misconfigurations and mitigating active threats. Used Splunk, Nmap, Wireshark, Snort, and Metasploit.

CYBERSECURITY RESEARCH PAPERS AND BLOGS:

- 1, Unauthorized Deep Learning Techniques for Identifying Insider Risks in Standardized Cybersecurity Database ([IEEE LINK](#))
- 2, Analyzing Social Engineering Attack Patterns Using Behavioral Psychology and AI-Driven Defense Mechanisms ([LINK](#))
- 3, Cognitive Cyber Defense Applying Artificial General Intelligence to Predict and Counteract Advanced Persistent Threats ([LINK](#))
- 4, My Cybersecurity Blogs – (<https://medium.com/@akash2kparas>)

PROJECTS

Threat Intelligence Pipeline & IOC Enrichment: Built an automated threat intelligence pipeline integrating OSINT feeds, VirusTotal, and **MISP** (Malware Information Sharing Platform) to enrich IOCs across **SIEM** environments. Reduced manual analyst enrichment time by 45% and improved detection accuracy by correlating 5,000+ daily indicators against enterprise telemetry, enabling faster and more confident triage decisions.

GenAI & Enterprise Data Loss Prevention (DLP): Implemented **GenAI** governance and **DLP** controls to detect and prevent sensitive data exposure across email, endpoints, and AI platforms including ChatGPT, Claude, and Gemini. Classified 500K+ records spanning **PHI**, PII, and financial data aligned with **HIPAA** compliance requirements. Enforced policy-based controls and monitored user behavior, reducing insider risk incidents by 40% and preventing data leakage across 3+ cloud environments.

Adversarial Detection Validation & Purple Team Simulation

Designed and executed purple team exercises simulating 15+ real-world adversary techniques mapped to MITRE ATT&CK, validating detection coverage across **CrowdStrike** and Rapid7 environments. Leveraged **Pentera** for automated penetration testing to continuously validate security controls, uncover exploitable attack paths, and measure detection efficacy under real adversarial conditions. Identified 20+ detection gaps, tuned existing rules, and built new use cases reducing mean detection time by 35%. Automated additional simulation workflows using Python and Atomic Red Team, improving SOC readiness and measurably strengthening enterprise detection posture.

Akash Parasumanna Sridhar (Open to Relocate)

Cell: +1 (346) 503-2322 | Email: akashpsusa@gmail.com | [Linkedin](#)

Security Engineer with 3+ years of experience designing, deploying, integrating, and operationalizing security controls across SOC operations, detection engineering, DFIR, endpoint security, email security, DLP/DSPM, and security. Experienced in building scalable detection workflows, improving telemetry coverage, supporting incident response, and strengthening enterprise security across and enterprise environments.

EDUCATION

University of Houston Dec 2023
 Master of Science in Cybersecurity, CGPA: 3.8/4.0

TECHNICAL SKILLS

Programming/Scripting/Markup Languages – Python, Bash, PowerShell, YARA, HTML, JavaScript, YAML, KQL
Operating Systems – Windows 10, Kali Linux, Ubuntu, CentOS 5 and 7, Android, iOS, ChromeOS, macOS.
Active Directory/General Penetration Testing Tools – BurpSuite, **OWASP ZAP**, Nessus, Nmap, Rustscan, Metasploit, Hydra, Ffuf, Wfuzz, Gobuster, SQLMap, CyberChef, PowerSploit, CrackMapExec, Impacket Suite, Nikto, Cain & Abel, Bettercap
Tools – Splunk, Elastic (Logstash, Kibana IPS/IDS), CrowdStrike, **Articwolf**, Microsoft Office (Excel, Word, Powerpoint), IDA PRO, Malware Bytes, Nessus, **Mimecast**, **DarkTrace**, Azure Kubernetes Services (Pods, Containerization, Docker), OpenVAS, Snort & OSSEC, Google Chronicle), Grafana Loki, **Qaulys**, Microsoft 365 Defender.
Core Skills – Bug Bounty and Penetration Testing, **Malware Analysis (SAST, DAST)**, Log Analysis, **OWASP Top 10**, Prompt Engineering, OSINT (Open-Source Intelligence), Vulnerability Assessment (CVE, CPE, CWE), MITRE ATT&CK, Metrics and Reporting, Tactics, Techniques, and Procedures (TTPs), Source Code Analysis (CI/CD), Checkmarx, Regulatory Compliance (GDPR, PCI-DSS, PHI, HIPAA, Threat Intelligence, ISO 27001, NIST Framework, GCP (Google Cloud Platform), Root causes Analysis, KPI Management.
Digital & Network Forensic Tools/VMs – Binwalk, Volatility, Autopsy, Splunk, SIFT Workstation, Wireshark, TCPDump, Tshark, Zeek.
AWS Tools/Services – EC2, Lambda, S3, DynamoDB.

WORK EXPERIENCE

Security Engineer, Campbell Clinic, Remote, USA Feb 2024 – Present

- Own day-to-day **SOC** operations, **detection engineering**, and incident response across **CrowdStrike**, Rapid7, Arctic Wolf MDR, Microsoft security telemetry, Mimecast, and Darktrace; reduced alert fatigue 40% and false positives 35% through tuning, enrichment, and threat-intelligence correlation.
- Build and optimize **detection use cases**, log ingestion, alert correlation, and digital forensics and incident response (**DFIR**) workflows across endpoint, email, Azure cloud, and enterprise infrastructure telemetry, improving visibility, investigation quality, and analyst triage speed.
- Automate alert triage, enrichment, patching support, and response workflows using **Fusion SOAR**, **Python** scripting, and cloud integrations; reduced mean triage time 50% and improved containment speed.
- Manage email security, authentication, and data-protection controls across Mimecast, Darktrace, SPF/DKIM/DMARC, Proofpoint, Microsoft Purview, and DSPM initiatives; reduced PHI/PII exposure risk and helped block 95%+ phishing attempts.
- Drive Proofpoint/Purview **DLP** and DSPM initiatives across 3+ cloud environments, reducing sensitive data exposure risk for PHI/PII and supporting healthcare security governance,.
- Led **POCs** and vendor evaluations for 10+ enterprise security tools across EDR/MDR, DLP/DSPM, email security, attack simulation, and AI governance; influenced \$500K+ in security tooling decisions.

Cybersecurity Intern, Schlumberger (SLB), Houston, TX, US. May 2023 – Aug 2023

- Developed Python pipelines to parse, normalize, and **structure Azure Kubernetes Service (AKS)** audit logs, improving visibility into container activity, user actions, and cloud security events.
- Operationalized **Elastic** Security, Kibana, and Logstash for high-volume telemetry ingestion; engineered **KQL** detection rules and automated alerting workflows that reduced false positives 25%.
- Reported a validated **Kibana** detection bug to the open-source repository and documented findings to support platform improvement and detection. ([GitHub](#)) and [Credly](#) Internship badge.

SOC Analyst, HTC Global Services Mar 2022 – Jul 2022

- Triaged **Splunk**/Elastic SIEM alerts, correlated security telemetry, and documented incident response actions.
- Performed Nessus/OpenVAS **vulnerability assessments**, validated critical findings, and supported remediation with system owners.

Cybersecurity Instructor, Zybeak Technologies(Part-Time) Sep 2021 – Jul 2022

- Imparted training and knowledge in **Certified Ethical Hacking (v11)** and **CompTIA Security+**, teaching individuals the critical techniques for detecting and thwarting cybersecurity breaches.

CERTIFICATIONS

2026	CrowdStrike Falcon Administrator	CrowdStrike
2021	Certified Ethical Hacker (CEH)	EC-Council
2021	Security+	CompTIA
2022	Certified EC-Council Instructor (CEI)	EC-Council

Enforced policy-based controls and monitored user behavior, reducing insider risk incidents by 40% and preventing data leakage across 3+ cloud environments.

Conferences and CTF:

1, BLACKHAT 2026: Selected as a speaker with an approved paper on “Detection Engineering Beyond the Inbox” ([LINK](#)) – Upcoming.

2, BlueTeamCon 2025 Speaker: Selected as a speaker with an approved paper on Hardening Healthcare Email Against Advanced Threats”. ([LINK](#))

3, HOU.SEC.CON 2025: Selected as a speaker with an approved paper on "Prescription for Security: Hardening Healthcare Email Against Advanced Threats.

4, HOU.SEC.CON 2024: Selected as a speaker "**AI Prompt Engineering in Cybersecurity**"

5, AWS Re:Invent 2025 – All Builders Welcome Grant (Fully Sponsored By AWS) **TryHackMe:** Completed 200+ Rooms - **Top 1%**

Bug Bounty: CyberForce Competition (November 2021) US. Department of Energy:

Represented the **University of Houston** in a nationally recognized cybersecurity competition with full sponsorship, where I secured **Amazon EC2** instances by identifying misconfigurations and mitigating active threats. Leveraged tools including Splunk, BurpSuite, OWASP ZAP, Nmap, Nikto, John the Ripper, Wireshark, Snort, and Metasploit to perform comprehensive vulnerability detection and analysis.
